

Jürgen Dressel has a PhD in organic chemistry. He worked as a medicinal chemist at Bayer Pharma for nine years until 1997 before he moved to the patents department and qualified as a European Patent Attorney. In 2002 he joined the Generics group in the Novartis patents department, in 2004 returned to the originator business and became responsible for Patents General Medicine which included the cardiovascular, respiratory and neuroscience disease areas. Since 2006 he is responsible for Pharma IP litigation with focus ex US. Jürgen's main experience is preparing for and executing litigation between originators and generics.
